## Generic birthday attack

# Generic attack on C.R. functions

Let  $H: M \rightarrow \{0,1\}^n$  be a hash function (  $|M| \gg 2^n$  )

Generic alg. to find a collision **in time**  $O(2^{n/2})$  hashes

Algorithm:

1. Choose  $2^{n/2}$  random messages in  $M$ :  $m_1, \dots, m_{2^{n/2}}$  (distinct w.h.p)
2. For  $i = 1, \dots, 2^{n/2}$  compute  $t_i = H(m_i) \in \{0,1\}^n$
3. Look for a collision ( $t_i = t_j$ ). If not found, got back to step 1.

How well will this work?

# The birthday paradox

Let  $r_1, \dots, r_n \in \{1, \dots, B\}$  be indep. identically distributed integers.

Thm: when  $n = 1.2 \times B^{1/2}$  then  $\Pr[\exists i \neq j: r_i = r_j] \geq \frac{1}{2}$

Proof: (for uniform indep.  $r_1, \dots, r_n$ )

$$\begin{aligned}\Pr[\exists i \neq j: r_i = r_j] &= 1 - \Pr[\forall i \neq j: r_i \neq r_j] = 1 - \left(\frac{B-1}{B}\right)\left(\frac{B-2}{B}\right) \cdots \left(\frac{B-n+1}{B}\right) = \\ &= 1 - \prod_{i=1}^{n-1} \left(1 - \frac{i}{B}\right) \geq 1 - \prod_{i=1}^{n-1} e^{-i/B} = 1 - e^{-\frac{1}{B} \sum_{i=1}^{n-1} i} \geq 1 - e^{-n^2/2B} \\ &\quad \uparrow \quad \quad \quad \uparrow \\ &\quad 1-x \leq e^{-x} \quad \quad \quad \frac{n^2}{2B} = 0.72 \end{aligned}$$
$$\geq 1 - e^{-0.72} = 0.53 > \frac{1}{2}$$

$B=10^6$

# Generic attack

$H: M \rightarrow \{0,1\}^n$  . Collision finding algorithm:

1. Choose  $2^{n/2}$  random elements in  $M$ :  $m_1, \dots, m_{2^{n/2}}$
2. For  $i = 1, \dots, 2^{n/2}$  compute  $t_i = H(m_i) \in \{0,1\}^n$
3. Look for a collision ( $t_i = t_j$ ). If not found, got back to step 1.

Expected number of iteration  $\approx 2$

Running time:  $O(2^{n/2})$  (space  $O(2^{n/2})$  )

# Sample C.R. hash functions:

Crypto++ 5.6.0 [ Wei Dai ]

AMD Opteron, 2.2 GHz ( Linux)

	<u>function</u>	<u>digest size (bits)</u>	<u>Speed (MB/sec)</u>	<u>generic attack time</u>
NIST standards	SHA-1	160	153	$2^{80}$
	SHA-256	256	111	$2^{128}$
	SHA-512	512	99	$2^{256}$
	Whirlpool	512	57	$2^{256}$

\* best known collision finder for SHA-1 requires  $2^{51}$  hash evaluations
